

QXU4006 Class Test

- **Date: Monday 5th of June**
- **Time: 4 - 5 pm China Time.**
- QMES Office will tell you the rooms. Start reading NOW. Test will be written in class

The test is worth **10% of your module score.**

The test will be under normal **exam conditions** – that means you are not allowed to use books, phones, computers, dictionaries or translators in the test. You must not talk or communicate with any other student during the test.

- There will be 6 questions to answer in 60 minutes.
- Each question is worth 10 marks. The number of marks for each part of the question is given after the question. You should aim to spend 1 minute for each mark.
- The topics will be on **metals, polymers and ceramics** from lectures **3-18**.
- The questions will be focused on processing methods and the effect these have on the microstructure of the material.
- Each question has a figure for you to write on or answer some short answer questions.
