

Materials Science 2 Properties, processing and applications of Polymers

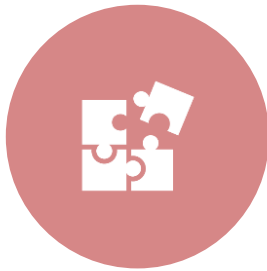

DR ADIJAT 'WUMI INYANG

(A.INYANG@QMUL.AC.UK)

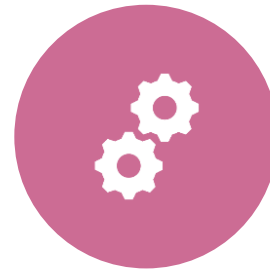

Aims for this week

DESCRIBE POLYMER
STRUCTURE IN RELATION
TO PROPERTIES

REVIEW POLYMER
CHEMISTRY AND
CHARACTERISTICS

DISCUSS THE
CLASSIFICATION OF
POLYMERS

GIVE EXAMPLES OF
APPLICATIONS OF
POLYMERIC MATERIALS

Learning outcomes

Describe

Describe characteristics of polymers based on their composition and structure

Diagram

Make diagrams of the three characteristics stress-strain behavior of polymers

Establish

Establish relationships between polymer structure and properties

List

List a range of polymer fabrication processes

Week 6 Outline

Monday

- Live stream lecture
- Video-exercise and quiz in QMPlus

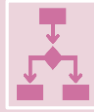

Wednesday

- Live stream lecture
- Video-exercise and quiz in QMPlus

Thursday

- Live stream lecture
- Coursework
- Exercises in QMPlus

What skills will
you obtain or
practice during
this section?

Describe

Describe technical methods for the fabrication of polymeric materials

Analyse and solve

Analyse and solve basic problems working individually

Research

Research information on the preparation and uses of polymeric materials

Team

Team work

Time

Time management

Questions for this module

WECOM WORK GROUPS: DURING
CLASS. THIS IS NOT MONITORED
OUTSIDE CLASS TIME

QMPLUS FORUM: ANY QUESTION
OUTSIDE CLASS TIME

EMAIL: PERSONAL ISSUES, NOT
RELATED TO HOMEWORK, CLASS
MATERIAL, MODULE CONTENT
