

Materials Science 2 Properties, processing and applications of Polymers (cont'd)

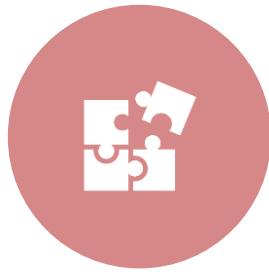

DR ADIJAT 'WUMI INYANG

(A.INYANG@QMUL.AC.UK)

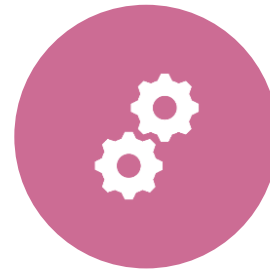

Aims for this week

DESCRIBE THE MECHANICAL
BEHAVIOR OF POLYMERS

EXPLAIN THE INFLUENCE OF
TEMPERATURE AND TIME ON
THE MECHANICAL BEHAVIOR OF
POLYMERS

DISCUSS THE VISCOELASTIC
BEHAVIOR OF POLYMERS

DESCRIBE FABRICATION
TECHNIQUES FOR POLYMERIC
MATERIALS

Learning outcomes

Describe

Describe stress-strain behavior of polymers graphically

Diagram

Make diagrams of the various stages of elastic and plastic deformation of polymers and elastomers

Establish

Explain the selection of fabrication techniques based on the type of polymer

List

List a range of polymer fabrication processes

Week 8 Outline

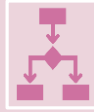

Wednesday

- Live stream lecture
- Online reading and quiz

Thursday

- Live stream lecture
- Exercises in QMPlus

What skills will you obtain or practice during this section?

Describe

Describe technical methods for the fabrication of polymeric materials

Analyse and solve

Analyse and solve basic problems working individually

Research

Research information on the preparation and uses of polymeric materials

Team

Team work

Time

Time management

Questions for this module

WECOM WORK GROUPS: DURING
CLASS. THIS IS NOT MONITORED
OUTSIDE CLASS TIME

QMPLUS FORUM: ANY QUESTION
OUTSIDE CLASS TIME

EMAIL: PERSONAL ISSUES, NOT
RELATED TO HOMEWORK, CLASS
MATERIAL, MODULE CONTENT
