

Materials Science 2

Properties processing and applications of ceramics

Dr Adijat 'Wumi Inyang
(a.inyang@qmul.ac.uk)

Aims for this week

Explain the classification of ceramics

Describe the mechanical properties of ceramics

Provide an overview of processing techniques for forming ceramics

Discuss applications of ceramics

Learning outcomes

01

Cite the key properties of ceramic that makes them good materials

02

Explain the mechanism of fracture for ceramic materials

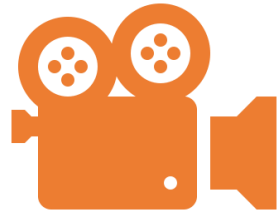

03

Describe two processes that are used to produce ceramics

04

List two applications of ceramic materials

Week 9 - Outline

Monday

Live stream lecture

Activities in QMPlus: video &
reading

Wednesday

Live stream lecture

Worksheet in QMPlus

Skills used & developed this week

- Interpret phase diagrams for ceramic materials
- Describe technical methods for the fabrication of ceramics
- Solve basic problems working individually
- Listening and understanding
- Team work
- Time management

Questions for this module

WECOM WORK GROUPS: DURING
CLASS. THIS IS NOT MONITORED
OUTSIDE CLASS TIME

QMPLUS FORUM: ANY QUESTION
OUTSIDE CLASS TIME

EMAIL: PERSONAL ISSUES, NOT
RELATED TO HOMEWORK, CLASS
MATERIAL, MODULE CONTENT
