

QXU5017 EXP2-1 Report Marking Criteria

Criteria	Excellent (80-100%)	Good (65-79%)	Fair (50-64%)	Needs improvement (0-49%)	Points
Section 1	• Clear and concise aims and objectives. • Accurately identify the mistakes/errors existing in the provided data. • Justification and decisions of the data are well explained.	• Clear aims and objectives. • Partially identify the mistakes/errors existing in the provided data. • Data change or modification are made without strong justification.	• Aims and objectives are vague or not fully relevant. • Identify the mistakes/errors existing in the provided data but justification is weak.	• Unclear aims and objectives. • Doesn't address the mistakes/errors existing in the provided data.	10
Section 2	• Correctly identify the parameter(s) that reflect the data quality. • Accurately explain the statistical significance thoroughly.	• Partially identify the parameter(s) that reflect the data quality. • Briefly explain the statistical significance.	• Partly identify the parameter(s) that reflect the data quality without sufficient explanation of their statistical significance.	• Fail to correctly identify the parameter(s) reflecting the data quality.	10
Section 3	• Clearly list all the valid zeta potentials with significant figures • Demonstrate the rounding procedure clearly. • Correctly calculate the required items with essential equations and represent with significant figures. • Provide a thoughtful discussion on the most appropriate unit.	• Clearly list all the valid zeta potentials with significant figures. • Correctly calculate the required items with essential equations. • Provide a simple discussion on the most appropriate unit.	• List all the valid zeta potentials without significant figures rounded. • Calculate the required items but lack essential equations. • Simply mention what would be the most appropriate unit without further discussion.	• Fail to apply significant figures and necessary calculations • Unit discussion is missing.	18
Section 4	• Plot histograms with all the information clearly labeled. • Provide detailed analysis of data distribution.	• Plot histograms with most key elements labeled. • Provide brief but relevant analysis of data distribution.	• Plot histograms with incorrect bin definitions or incomplete labeling. • Draw conclusion without discussion in depth.	• Fail to plot the histogram. • No analysis or discussion of data distribution.	12

Criteria	Excellent (80-100%)	Good (65-79%)	Fair (50-64%)	Needs improvement (0-49%)	Points
Section 5-7	• Use graphic method to compare the data with all the key information clearly labeled. • Apply appropriate significant test (if can be used) with adequate justification and detailed testing procedure.	• Use graphic method to compare the data with most key elements labeled. • Apply appropriate significant test (if can be used) with basic justification and testing procedure.	• Use graphic method to compare the data lack detail. • Apply the significant test (if can be used) with weak justification and testing procedure.	• Fails to use graphic method to compare the data • Fails to apply appropriate significant test to compare the data.	15 10 15
Section 8	• Provide an thoughtful, well-structured reflection including specific insights of the data comparison. • Strong description of groupwork with clear examples.	• Provide a clear reflection on learning with some specific examples but lacking depth. • Good description of group work but lacking a few details.	• Provide basic reflection with few insights. • Mention group work with minimal examples.	• Show little or no reflection on learning with general thoughts. • Little or no mention of group work with negative experience.	10
Quality of English and Reference	• Exceptionally well-written, no errors, and perfectly formatted references. • Filename, report title, spreadsheet title, authors are clear and correct.	• Well-written with minor grammatical or referencing errors. • Filename, report title, spreadsheet title, authors are mostly correct.	• Acceptable writing with noticeable grammatical errors or referencing issues. • Filename, report title, spreadsheet title, or authors are incorrect or missing.	• Poor writing, frequent errors, and inadequate or incorrect references. • Filename, report title, spreadsheet title or authors is missing.	0
